**MTG-PUBLIC**  
 193.0.8.0/23  
 2001:610:241:0::/64

**MTG-SERVICE**  
 193.0.10.0/25  
 2001:610:241:1::/64

**MTG-PRIVATE**  
 193.0.10.128/25

# RIPE52 Technical Problems

- Monday
  - “ripencc” add-hoc network in wireless
  - Wireless coverage
  - Webcast audio problems
- Tuesday
  - Power/Network outage
    - Power outage followed by UPS failure which caused all our equipment to go down.
    - We started to have 90% packet loss to our uplink after power-cycle. That at the end resolved by powering the router down, waiting a couple of minutes and starting it again.
- No major technical problems for the rest of the week
